

# SE 3010: Android Application Development

## Assignment: GeoQuiz

### Requirements

- Create a simple Android application, GeoQuiz, as described in Chapters 1-4 and 7.
- Additionally, read Chapters 5-6 and 8. Code implementations are optional for these chapters.

### Resources

- Refer to the [Android developer documentation](#) as needed when completing your assignment.

### Submission

1. Submit your project using Git and GitHub. Start by creating a repo for this assignment [here](#).
2. Show your completed assignment to the instructor during class or office hours to receive credit.
