Part II -Cloning

NOTE: This is an updated version from the GitHubTutorialSSH.pdf file (updated 7/14/2022)

Step 1: Remove your Demo directory on your CLI. You may have to enter 'yes' a few times in order to remove it.

Step 2: Go to your Demo repository on github and click on the green download Code button.

Select the SSH link as shown:							
	Go to file Add file -	Code 🗸					
۶- Clone		(?)					
HTTPS S	SSH GitHub CLI						
git@githuk	com:/demo,g	it (C					
Use a passwor	d-protected SSH key.	1					
🛃 Open wi	th GitHub Desktop						
Downloa	ad ZIP						

Step 3: Copy the URL to the clipboard and then paste it into your CLI virtual machine prompt:

h@cli1:~\$	git d	clone	git@github	.com:	./demo	.git
