

# IT 4100: File Systems

## Questions 3

Due according to date on Canvas

### Assignment

Create 10 multiple choice questions relating to anything we have covered since the last exam.

- ScaleIO
- FreeNAS
- Windows Shares
- FAT
- NTFS
- Forensics
- Datacenter Visit
- IBM Spectrum Scale
- Dual-boot
- Google Storage

Good content for questions can come from my slides, lectures, or the assigned reading. You shouldn't write questions that aren't beyond these things.

### Submission and Passoff

- The questions should be in a text file named `questions.txt`. It should be a plain text file. Each question should have the following format:

```
Question Text
```

```
Answer Distractor 1 Distractor 2 Distractor 3
```

So one of my questions might look like this:

```
What is the minimum block size on an EXT4 filesystem?  
1024  
2048  
4096  
8192
```

- Use the [Submissions link](#) at the top of the page to submit your text file to the `Questions 2` assignment.
