

# Research Assignment

With prior approval from your instructor, you should research one of the following topics and come prepared to teach it to us. You should have a demo that we can follow along with.

Topic list:

- Cloud-based storage(gcloud?)
- afs
- zfs
- Gluster, Lustre, or CEPH
- Distributed Replicated Block device
- fuser command (fuse filesystem)
- file locking
- other???

Your presentation might consist of a series of powerpoint slides, a demo, something that we can follow along and do, kahoot, etc... (need not do all of those) You should plan on 20-30 minutes.
