

Presentation

Your task is to plan a short class demonstration about something that you find relevant to our course. You should obtain pre-approval from the instructor. This might require some research and preparation on your part. You could choose to have the class follow along, or not. It would be wise to make sure things work, prior to your demo in class.

You should NOT wait until the due date to complete this, you should schedule your slot with the instructor ASAP.

A 5-10 minute demonstration (as we have already seen some) will suffice.
